

Don't be left at sea

Keeping old marine safety distress signals is dangerous

www.dnrme.qld.gov.au

Don't dispose of damaged or expired marine safety distress signals with your everyday rubbish. It is too dangerous!

Surrender these items only in marked bins at authorised collection points, such as coastguard and air sea rescue stations (for locations, visit *Marine Safety Queensland* at <http://www.msq.qld.gov.au/Safety/Distress-signals/Flare-disposal-locations.aspx>).
