

Resources Safety and Health Queensland Industry Leaders' Briefing 2023

Dr Gareth Kennedy and Sebastian D'Hyon
Simtars

Key messages

- Simtars 2022 update
- R&D at Simtars
 - New 5 Year Research Strategy
 - Current project highlights
 - Incident investigation tools

Simtars' role in industry

- We provide **contemporary testing, engineering, scientific** that enhance safety and health outcomes.
- We **collect, analyse and share data** for serious and designated accidents and incidents.
- We actively **support emergency preparedness and response**.
- We thoroughly **investigate all fatalities**, complaints and certain **serious accidents and high potential incidents**, in a timely manner.
- **Learnings** derived from **safety and health** data collection is **shared with stakeholders**, to manage risks.
- We sponsor and undertake **research**.

Simtars' 2022 update in numbers

**1,420 support hours
(Camgas & Safegas)**

**1319 calibrations
(& 196 repairs)**

**287 hours - 3D
Scan Team Call-out**

**21,763 Roadway Dust
Samples Analysed**

28 courses (704 participants)

**5,970 Hygiene
Samples Analysed**

64 audits conducted

Research and Development

Current and future

5-year Strategic Plan

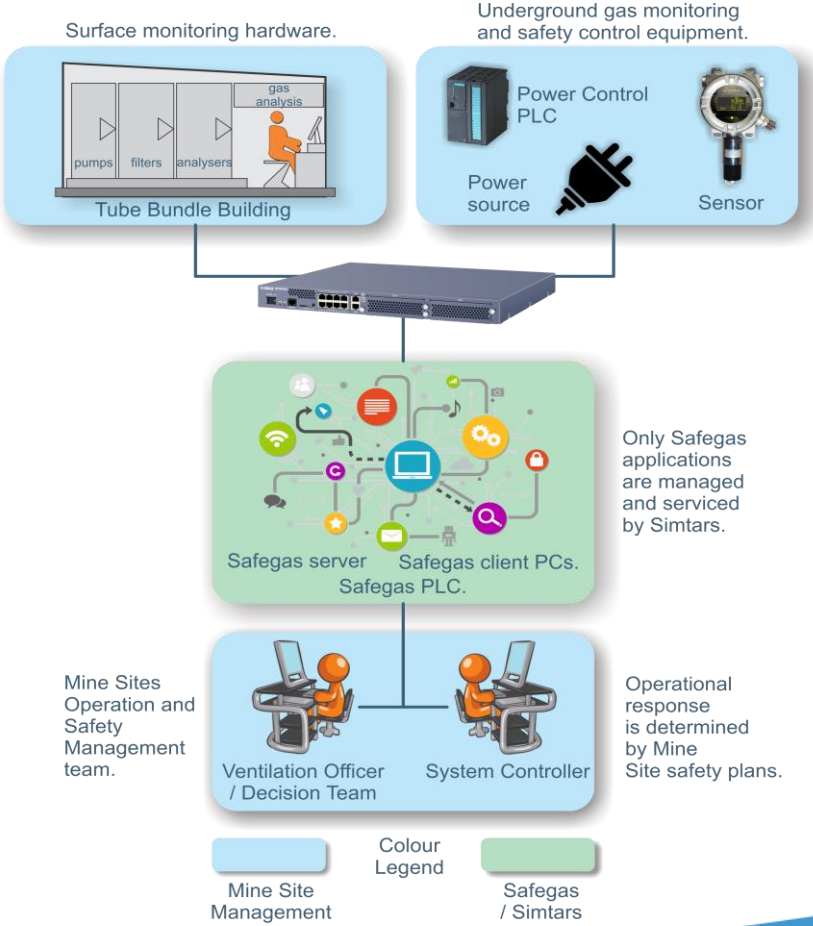

1. Emergency preparedness and response.
2. Technology to operations or practice.
3. H&S priority issues as nominated by industry and the regulator .
4. Foresight and intelligence
 - a. 2050 transition and adaptation
 - b. global connections
 - c. government connections.
5. Step change in organisational H&S systems.

Mine gas monitoring

- Emergency response
- Early spontaneous combustion detection
- Safegas Version 5
- Development of an automated leak detection system
- Gas detector accuracy

Safegas Version 5 - Mine gas monitoring

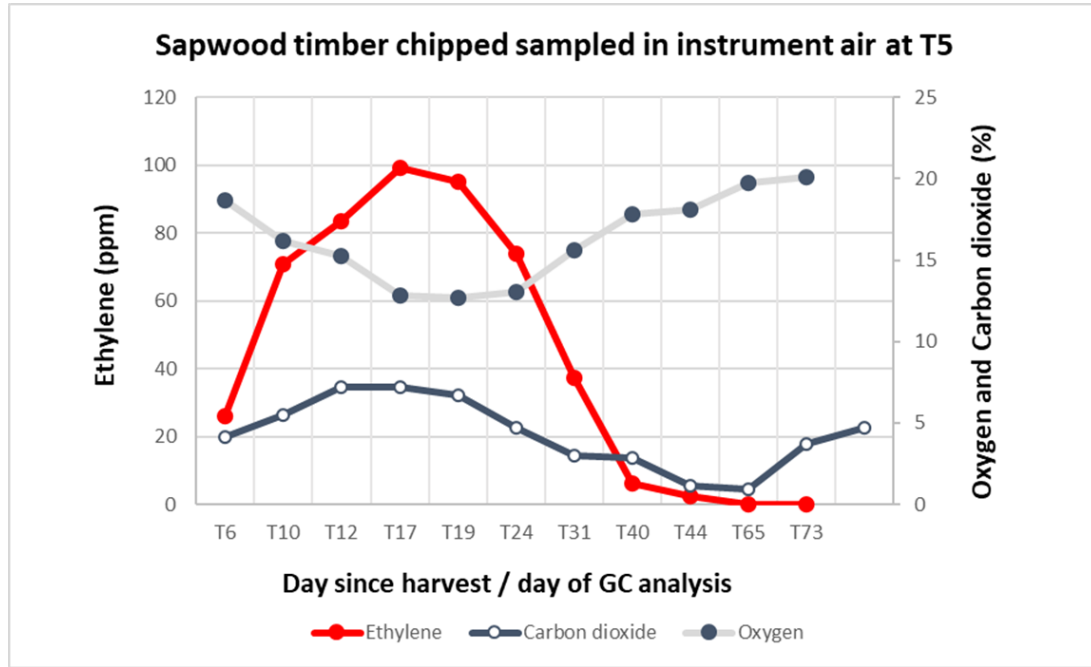

Spontaneous combustion research

ACARP

Project C25072

Ethylene from wood

ACARP

Project C29024

Investigation support

- 3D scanning technology
- Incident response tool
- Example incident sites
- Analytical tools

Simtars 3D scan utilisation

22 separate incidents since 2018:

- Underground mines
- Surface sites

Coal mine roadway scan

VIDEO

Analysis tool

- Full engineering measurement (CAD based)
- Rendering
- Animation

Demonstration

Key advantages

- Rapid capture of an incident
- Investigator(s) can re-visit virtual scene at any time in the future
- Release of incident site quickly
- Future:
 - Virtual reality - accident scene recreation e.g. industry sharing / training
 - Further research – rapidly growing technology sector

Thank you
