- As at 25<sup>th</sup> Oct 7 cases of silicosis identified in Qld Mineral Mines and Quarries
- Guideline for Respirable Crystalline Silica introduced.
- 30 targeted inspections for 2017

# Safety & health management systems

- Effectiveness of SHMS is measured in the mine.
- 110 directives issued last year
- Get a fresh set of eyes to conduct audits

Sect 38 of Mining and Quarrying Safety and Health Regulation: Obligations of Operators:  
*(e) to audit and review the effectiveness and implementation of the safety and health management system to ensure the risk to persons from operations is at an acceptable level*

# Contractor management

- Contractor Management is an area of focus
- Contractors not familiar with the mines SHMS
- The contractor's SHMS integrates into the Mines SHMS

Sect 37 of Mining and Quarrying Safety and Health Regulation: Obligations of site senior executive for mine: *(c) to develop and implement a single safety and health management system for all persons at the mine*

# Safety Journey

Culture

Workforce “owns” the safety system

Self Perpetuating

“Look out for your mate”  
Responsibility is taken on for the group.

Value

Trust and Accountability

Proactive

Continuous improvement from all levels.  
People are taking personal responsibility for their own safety

Systems and Controls

Robust systems in place  
People are comfortable with the planning required.

Reactive

LTI’s managed  
Breach of rules noticed and action taken.

Enforced Compliance

Safety is an enforced requirement.  
Prescriptive.  
Safety is an addition to our workload.

Priority
